Mr. R. Matthews, P. Geo.  
Manager, Water Power Act Licensing  
Manitoba Conservation and Climate  
1007 Century Street  
Winnipeg, MB R3M 0W4

Dear Mr. Matthews:

### **PINE FALLS GENERATING STATION – SHORT TERM EXTENSION LICENCE**

We request renewal of the Short Term Extension Licence (STEL) for the Pine Falls Generating Station under the provisions of Section 92(6) of Water Power Regulation 25/88R. We request that the STEL be renewed for an additional five year term. The Second STEL was issued for a five year term on August 26, 2015.

Manitoba Hydro submitted the technical requirements for completing the Renewal Licence for Pine Falls to Manitoba Conservation and Climate in 2019. We would like to highlight that Units 4, 5 and 6 have been refurbished and Unit 3 re-runnering is currently underway and scheduled to be completed in 2020, increasing the total generating station capacity to 100.6 MW.

Manitoba Hydro continues to operate the Pine Falls Generating Station in compliance with the Second STEL. The supporting documentation provided in 2010 prior to issuance of the STELs is still valid and ongoing compliance with the licence is documented in our Annual Water Levels and Flows Compliance Report.

If you have any questions about this matter, please call me at (204) 360-3018.

Yours truly,

W.V. Penner, P.Eng  
Manager, Hydraulic Operations Department
